

Home Page:

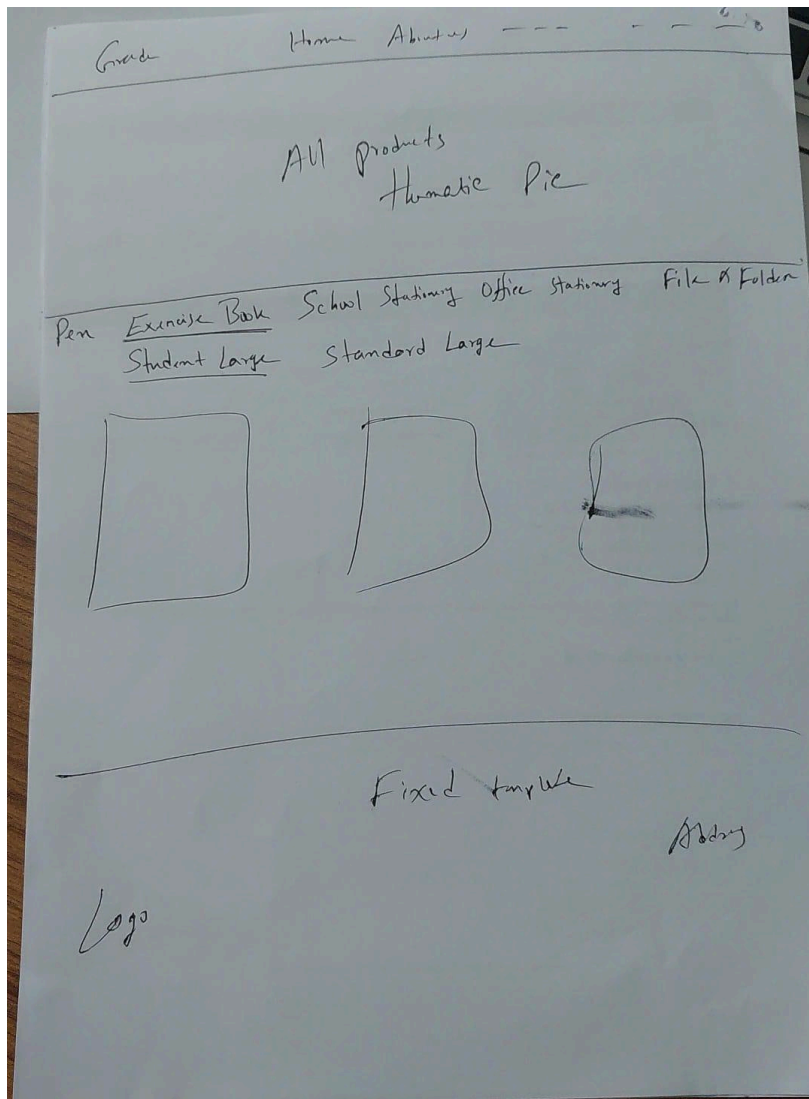

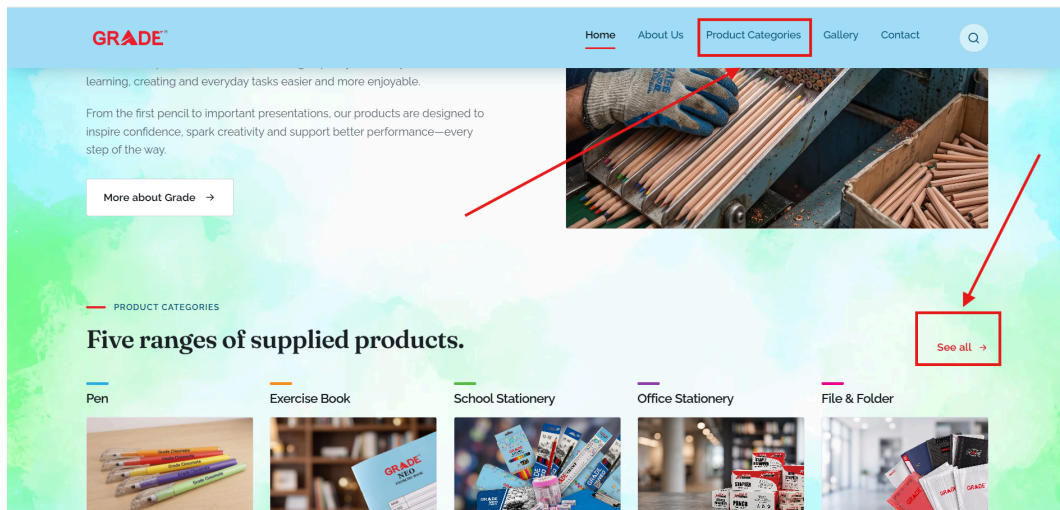

1. Hero Slider: first image has perfect height to fit in the screen. Rest of the images have more heights pushing the next/prev buttons out of the screen.
2. “**View the range**” button-background should be more see-through. Next/Prev looks good. That can be a reference.
3. **Search Screen** background blur looks really dark. Make it lighter and a bit less blurry.
4. Hero Slider and Client slider need to switch with a bit less interval. The interval can be around 3 sec.
5. **Product Categories** section in the Home Page should have a **Slight Popup/zoom** effect on mouse hover. It is already implemented in the Product Details modal.

6. Home page footer looks empty. Add a button with customizable label and link in that area.

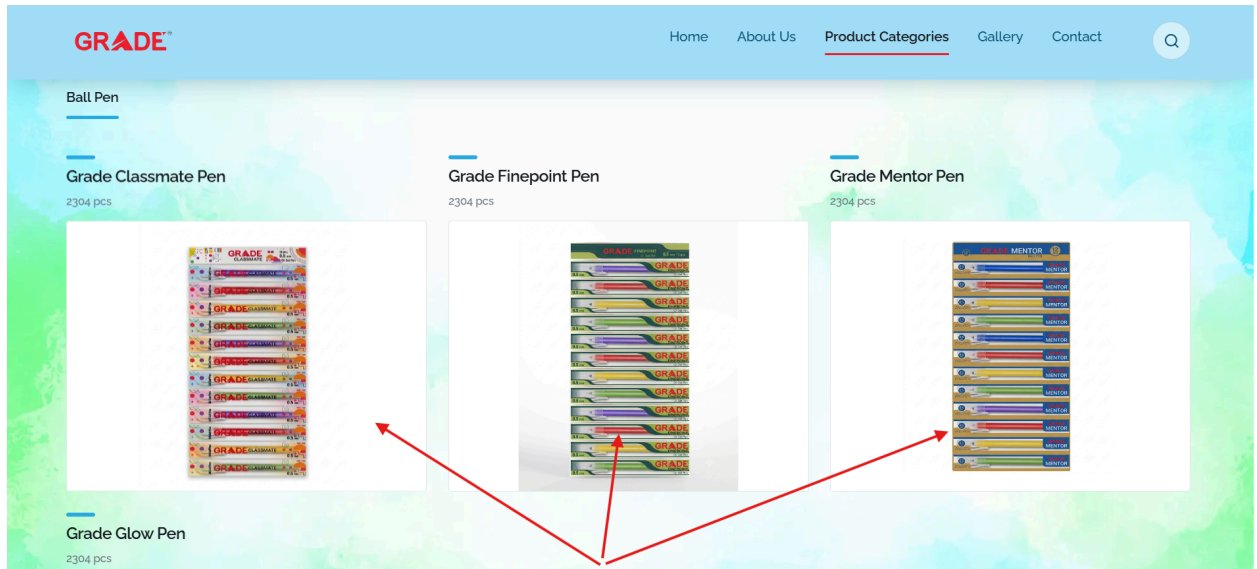

7. "See All" button and "Product Category" menu should redirect to a new page. Providing a hand draft provided by the Client -

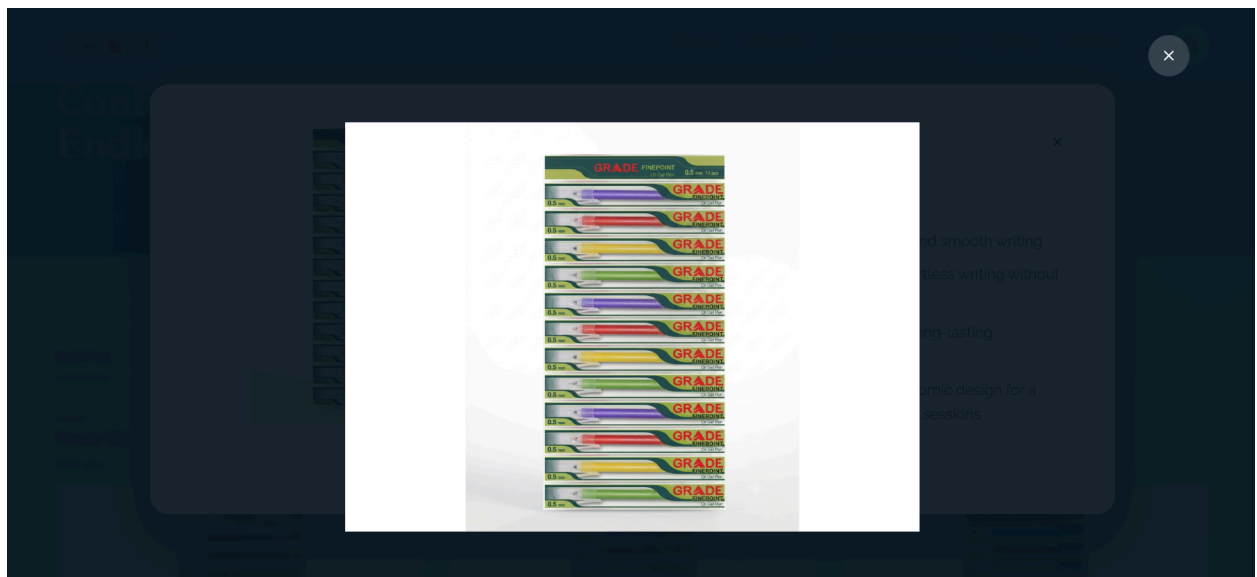

Product Category:

1. Hovering over a Product image should show a slight popup/zoom effect (currently shows a red border). It is already implemented in the Product Details modal.

2. In this view, the image should zoom in or zoom out on mouse scroll.

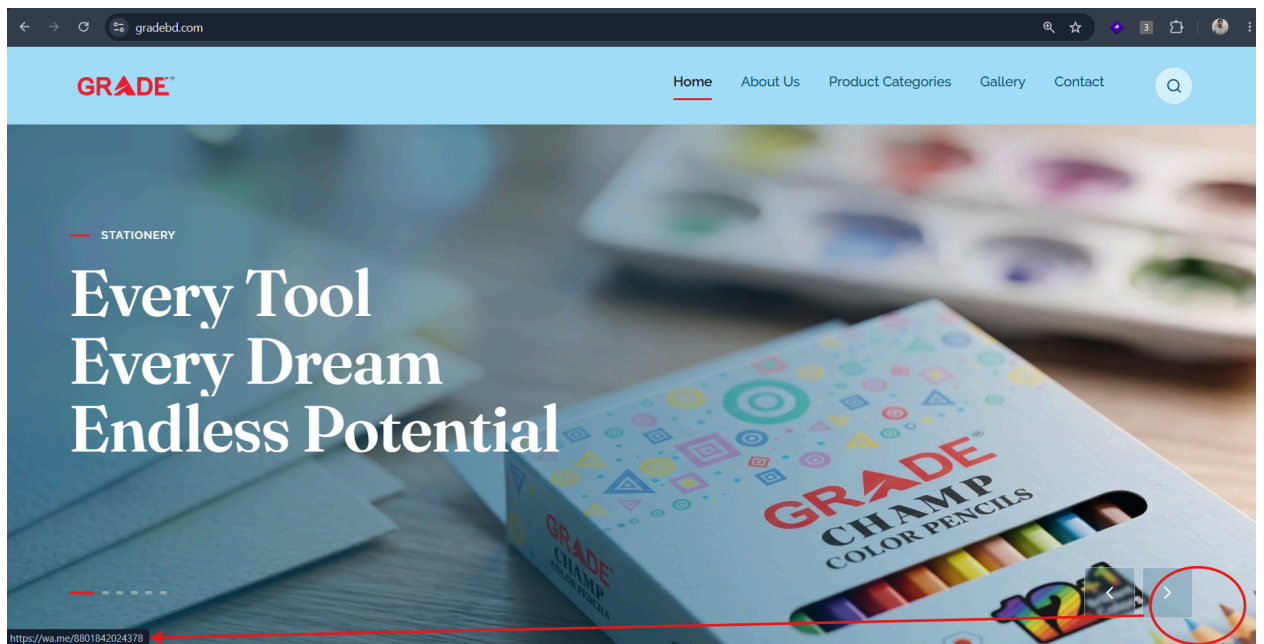

Contact Page:

1. Address section - **Contact Number & Email** text change. Should be like the following

Common Issue:

1. The **WhatsApp** icon is hidden but it is still clickable. Check in the marked area and you can see it's clickable. This issue is in every page

2. Contents in the Hero slider and header moves toward center when the screen size is increased. They should maintain a fixed left-margin and right-margin.
